Education

University of Ottawa

Expected Graduation – April 2027

Honours Bachelor of Computer Science

Ottawa, ON

Relevant Courses: Data Structures and Algorithms, Object-Oriented and Functional Programming, System Design, Database Management, Networking, Operating Systems, Fundamentals of Data Science

Work Experience

Software Engineer in Test (SDET) | Advanced Micro Devices, Inc. (AMD)

May 2026 – August 2026

- Incoming Summer 2026 - Display Team

Software Automation Engineer | Royal Bank of Canada (RBC)

January 2026 – April 2026

- Developed features for a **GenAI** knowledge hub using **Python**, **LangChain**, and **FastAPI**, integrating **ChromaDB** and **RAG** retrieval pipelines that improved response relevance and minimized hallucinations in chatbot outputs.
- Implemented **agentic LLM** workflows to fetch Jira/Confluence data via **Model Context Protocol (MCP)** and translate content into executable code templates and test scenarios, reducing manual implementation effort.
- Enhanced the regression suite for the Avion Rewards web platform using **TypeScript** and **Playwright**, structuring UI automation with the **Page Object Model (POM)** and validating API responses against **Swagger (OpenAPI)**.
- Scaled cross-platform test automation for **mobile (iOS/Android)** services using **Java**, **RestAssured**, and **TestNG** to strengthen coverage for newly deployed builds, accelerating the release cycle.

Software Engineer | Magnet Forensics

September 2025 – December 2025

- Deployed **C# .NET** agents into **AWS cloud environments** utilizing queuing logic for S3 multipart upload algorithms, accelerating data transfer speed by **50%**.
- Developed **Jenkinsfile (Groovy)** pipelines to automate deployment and release configurations within **ETL** workflows, leveraging **Git** for collaborative development.
- Designed multi-OS endpoint frameworks for artifact collection across **Windows**, **macOS**, and **Linux**, managing system-level dependencies via **Unix** and **PowerShell** scripting
- Improved **client-server** interaction and **API** security through performance monitoring, employing **Docker** for scalability testing, and validating **HTTPS** traffic integrity via **Charles Proxy**.

Software QA Engineer | JSI Telecom

January 2025 – April 2025

- Designed and managed test cases and test runs in **TestRail**, ensuring complete coverage of **regression**, **functional**, **sanity**, and **edge-case** scenarios across **Kubernetes**-hosted domains and clusters.
- Executed automated **UI** and **E2E** test scripts for plugins using **TestComplete (C#)**, applying **debugging** methods such as setting breakpoints, watch variables and reviewing error logs to identify and resolve test failures.

Software Test Analyst | Employment and Social Development Canada

May 2024 – December 2024

- Validated data exchange between client applications and databases using **Postman** for **JSON** response analysis, evaluating parameter values and **SQL** query results to ensure consistent business logic.

Software QA Engineer (Web) | Department Of Justice Canada

January 2024 – April 2024

- Optimized web navigation and **WCAG** compliance across **300 sites** by inspecting the **DOM** with **JavaScript** and automating accessibility audits via **Chrome DevTools** and **axe**.

Projects

What The Tech | uOttHack 8 | *TypeScript, Next.js, React, Zustand, PostgreSQL, Google Gemini API, OpenRouter*

- Developed an **AI-powered SaaS** platform using **TypeScript**, **Next.js**, and **Supabase (PostgreSQL)** that ingests **GitHub** repositories, transforms codebases into structured **XML** context, and supports **Google Gemini**-powered conversations and visual diagrams grounded in repository data.

Technical Skills

Languages: C#, Python, Java, JavaScript, TypeScript, C, PostgreSQL, HTML, CSS, Groovy, Dart

Frameworks/Libraries: .NET, Selenium, Playwright, React, Angular, Flutter, xUnit, TestNG, LangChain

Tools: Jira, AWS, Docker, PowerShell, Swagger, Azure DevOps, Postman, Firebase, Jenkins, Node.js, Git, GitHub Actions, TestComplete, TestRail, MySQL, Android Studio, Visual Studio

Other Skills: MCP, Prompt Engineering, Quality Assurance, Infrastructure Automation, Documentation, Generative AI
